Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a low fuel indicator system. Each independent claim identifies the uniquely distinct features "a customizable low fuel indicator comprising an input device in communication with the control unit for selecting a threshold distance to empty and activating an indicator when the distance to empty is less than the threshold distance to empty". The closest prior art, Ghitea, Jr. et al. (US 5,693,876) and Swanson (US 5,866,797) discloses conventional fuel economy and fuel level display, either singularly or in combination, fail to anticipate the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Brehob et al. (US 5,578,748), Sember (US 6,038,917), Baatz et al. (US 4,706,083) and Ehlbeck et al. (US 6,092,021) are cited to show a variety of fuel economy display systems.
